

How to load HP Deskjet 6122 paper

Many problems are associated with a paper tray being low. This is a common problem and is quite easy to fix.

Written By: Joe

INTRODUCTION

This guide will walk you through how to change the paper and common problems and solutions associated with being low on paper.

Step 1 — How to load HP Deskjet 6122 paper

- Inspect to see if the paper tray is empty.

Step 2

- Add some paper if there is none, if there is, realign the paper to fit on top of the gears so it feeds through properly.

Step 3

- Ensure that all paper is in the correct tray, the correct tray is on the upper deck of the printer.

Step 4

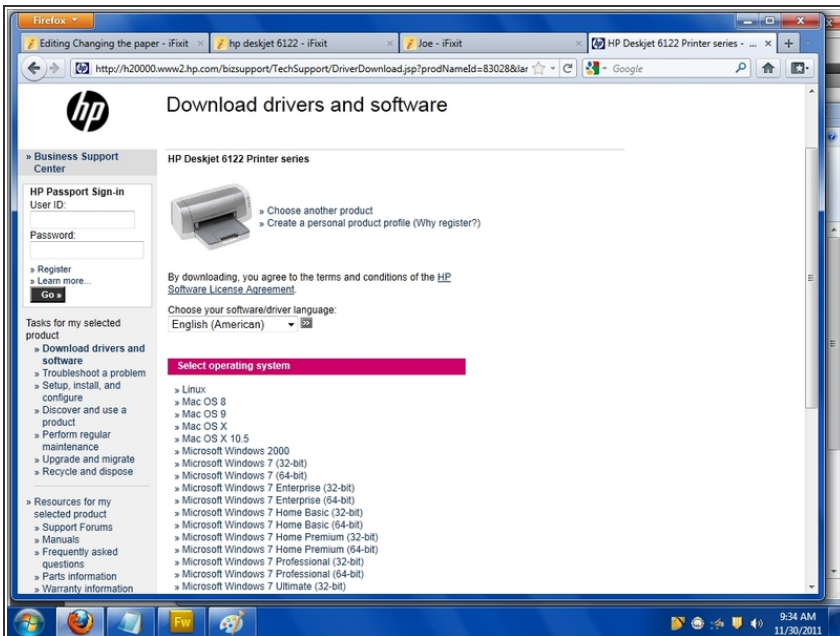

- Run the printer to verify it now prints. If it still does not, inspect the paper tray again.

Step 5

- Remove any paper that looks to be overloading the tray feeder. Sometimes there can be too much paper in the tray and it won't print because of this.

Step 6

- Retry the print one last time, if it still fails, consider consulting a page to update drivers.

To reassemble your device, follow these instructions in reverse order.
